

Program	BACHELOR OF TECHNOLOGY (B.Tech)	Semester - 1
Type of Course	Engineering Science Course	
Prerequisite		
Rationale	-	
Effective From A.Y.	2025-26	

Teaching Scheme (Contact Hours)				Examination Scheme				
Lecture	Tutorial	Lab	Credit	Theory Marks		Practical Marks		Total Marks
				SEE TH	IAT	SEE P	CCE	
0	0	2	1	-	-	80	20	100

SEE - Semester End Examination, IAT - Internal Assessment Test, CCE - Continues & Comprehensive Evaluation

Suggested Distribution Of Theory Marks Using Bloom's Taxonomy						
Level	Remembrance	Understanding	Application	Analyze	Evaluate	Create
Weightage	20	30	30	20	0	0

NOTE : This specification table shall be treated as a general guideline for the students and the teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Course Outcomes	
At the end of this course, students will be able to:	
C01	Create basic web pages using HTML elements.
C02	Apply CSS styling and responsive layouts using Flexbox and Grid.
C03	Perform client-side validation using JavaScript.
C04	Design mobile-friendly, aesthetic UIs using Bootstrap components and utilities.
C05	Integrate AI-powered tools like GitHub Copilot into their development workflow.
C06	Integrate HTML, CSS, JavaScript, and Bootstrap in a complete web interface.

Reference Books

1.	Mark Myers – A Smarter Way to Learn JavaScript
2.	Jennifer Niederst Robbins – Learning Web Design, O'Reilly
3.	Jon Duckett – HTML & CSS: Design and Build Websites, Wiley (TextBook)
4.	Robin Nixon – Learning PHP, MySQL & JavaScript with CSS & HTML5, O'Reilly (TextBook)

List of Practical

1.	Create a basic webpage using HTML displaying personal bio and contact info.
2.	Design a multi-section layout with headers, footers, tables, and forms.
3.	Create a webpage with a responsive navigation bar using only CSS.
4.	Design a photo gallery using CSS Grid and Flexbox.
5.	Develop a registration form with client-side validation using JavaScript.
6.	Create a to-do list app with JavaScript DOM manipulation.
7.	Use Bootstrap to create a responsive portfolio website.
8.	Create a multi-page website with internal linking and styled components.
9.	Add interactive features (modals, sliders) using Bootstrap and JS.
10.	Use Git to version-control a website project and push it to GitHub.
11.	Deploy your personal portfolio site using GitHub Pages or Netlify.
12.	Mini Project: Develop a fully functional responsive website (e.g., restaurant, event, portfolio, or blog website)
